

ADVANCED FIRE AND SAFETY INDIA PVT LTD

QUICK RESPONSE VEHICLE (QRV)

APPLICATIONS

- Purpose: Designed for rapid response to fire incidents and emergencies.
- Speed: Allows firefighters to reach the scene quickly, often before full fire trucks arrive.
- Size: Typically smaller and more maneuverable than traditional fire engines.
- Equipment: Equipped with essential firefighting gear, first aid supplies, and sometimes, a small water tank.
- Crew: Usually staffed with a minimal crew of firefighters, often paramedics or emergency medical technicians.
- Versatility: Can be used for various emergencies, including medical calls, vehicle accidents, and hazardous material incidents.
- Communication: Equipped with communication systems for coordinating with central dispatch and other emergency services.
- Community Role: Often used for public events and community outreach, educating on fire prevention and safety.
